- Less than 20 bps impact on Revenue for the On-site activity in FY2019 with negligible impact on margin. The organic growth impact will be highlighted in financial communications each quarter.
- Prospective application from September 1, 2018 with no restatement of comparative as no material impact.
- Investments in equipment on client sites agreed contractually with clients will remain accounted for as CAPEX.
- Client investments (cash payments made to clients) were already deducted from revenue and will remain as such.
- No change in Benefits & Rewards Services revenue recognition.

NET TO GROSS CAPEX TO SALES

* In this pro-forma Client investment amortization has been added back to Revenue and accounted for as CAPEX amortization to align with the current accounting treatment of our peers. CAPEX in cash flow has also been adjusted to reflect gross CAPEX including Client investment cash out flows and cancellation of disposals of assets.

- Prospective application from September 1, 2019 with no restatement of comparative.
- Work in progress regarding the assessment of impact: preliminary estimate shows circa €1bn of net debt, therefore increase in Net debt/EBITDA ratio by +0.7 net debt/ EBITDA ratio* from FY2020.

REVERSE FACTORING:

Our reverse factoring program has been put in place as part of a “supplier support Program” which was implemented in the context of the standardization of our P2P process. The objectives of this supplier support program were to:

- have the opportunity to work with suppliers which in the past had not accepted our terms and conditions;
- allow our suppliers to gain access to a way to be paid in a fast and secured manner at a low cost of financing;
- improve the perception of Sodexo as a “buyer”;
- standardize our payment terms in each significant region of the Group;
- gain in efficiency in Shared Services Centers with an automatic processing of supplier invoices validated by the Group;

The reverse factoring program usage by our suppliers amounted to €370M as at August 31, 2018, with no impact on working capital or cash-flow.

For the reverse factoring programs that have been implemented in the context of our supplier support program:

- Suppliers have the choice but not the obligation to sell, invoice by invoice, their approved receivables before the maturity date.
- Sodexo has no power over the supplier’s decision to sell or not sell its receivables. This is not a tri-partite agreement;
- In instances where payment terms were modified, terms changed for all supplier invoices irrespective of whether supplier financing was or was not utilized;
- Sodexo does not receive any fees or payment from the factor nor do we make any payment to the factor other than the payment of the original invoice;
- Suppliers invoices continue to be paid according to the payment terms negotiated with the suppliers. Whether the bills are in the program or not, the payment date remains the same.
- Such programs have not changed our liabilities towards our suppliers, which is the reason why these liabilities remain as trade payables and are not reclassified as financial debt under IFRS.

ALTERNATIVE PERFORMANCE MEASURE DEFINITIONS

Appendix 13

Blended cost of debt

The blended cost of debt is calculated at period end and is the weighted blended of financing rates on borrowings, (including derivative financial instruments) and cash pooling balances at period end.

Free cash flow

Please refer to Cashflow position.

Growth excluding currency effect

Change excluding currency effect calculated converting FY 2018 figures at FY 2017 rates, except when significant for countries with hyperinflationary economies.

As a result, for Venezuelan Bolivar, FY 2018 and FY 2017 figures in VEF have been converted at the exchange rate of USD 1 = VEF 6,112,000 vs. VEF 3,250 for FY 2017.

Issue volume

Issue volume corresponds to the total face value of service vouchers, cards and digitally-delivered services issued by the Group (Benefits and Rewards Services activity) for beneficiaries on behalf of clients.

Net debt

Group gross borrowings at the balance sheet less operating cash.

Organic growth

Organic growth corresponds to the increase in revenue for a given period (the "current period") compared to the revenue reported for the same period of the prior fiscal year, calculated using the exchange rate for the prior fiscal year; and excluding the impact of business acquisitions and divestments, as follows:

- for businesses acquired (or gain of control) during the current period, revenue generated since the acquisition date is excluded from the organic growth calculation;
- for businesses acquired (or gain of control) during the prior fiscal year, revenue generated during the current period up until the first anniversary date of the acquisition is excluded;
- for businesses divested (or loss of control) during the prior fiscal year, revenue generated in the comparative period of the prior fiscal year until the divestment date is excluded;
- for businesses divested (or loss of control) during the current fiscal year, revenue generated in the period commencing 12 months before the divestment date up to the end of the comparative period of the prior fiscal year is excluded.

For countries with hyperinflationary economies all figures are converted at the latest closing rate for both periods when the impact is significant.

As a result, for the calculation of organic growth, Benefits & Rewards figures for FY2018 and FY 2017 in Venezuelan Bolivar, have been converted at the exchange rate of USD 1 = VEF 6,112,000 vs. VEF 3,250 for FY 2017.

Underlying Operating profit

Operating profit excluding other operating income and other operating expenses. Other operating income and expenses include gains or losses related to perimeter changes and on changes of post-employment benefits, restructuring and rationalization costs, Acquisition related costs, amortization and impairment of client relationships and trademarks, impairment of goodwill and impairment of non-current assets.

Underlying Operating margin

Underlying Operating profit divided by Revenues.

Underlying Operating margin at constant rate

Margin calculated converting Fiscal 2018 figures at FY 2017 rates, except for countries with hyperinflationary economies when the impact is significant.

Underlying Net profit per share

Underlying Net profit per share presents the Underlying net profit divided by the average number of shares

Underlying Net Profit

Underlying Net profit presents a net income excluding significant unusual and/or infrequent elements. Therefore, it corresponds to the Net Income Group share excluding Other Income and Expense and significant non-recurring elements in both Net Financial Expense and Income tax Expense.

In the Fiscal 2018, the Underlying net profit excludes from the Net Income Group share the following items and the related tax impact where applicable:

- Other Income and Expense for - €131m
- Interests received in France on tax reimbursements for €7m
- Reimbursement of the 3% tax on dividends received for €43m
- One-off impacts resulting from changes in the US tax regulation for - €13m
